

By maintaining your dogs dental hygiene you can help prevent them having to go to the vet for treatment. This service supports the destruction of bacteria on the teeth, under the gumline and even into the gingival pockets.

The noiseless toothbrush is **stress free** while **combatting** plaque and tartar formation, oral cavity diseases, gingivitis, periodontitis and bad breath. It is also **abrasion-free** so doesn't hurt the enamel.

Speak to your groomer today!
